offices.

One House committee claims to have achieved savings by eliminating a day care program to provide suppers. But it also slipped into the change of the law to say that lunches can be served at supper time.

Actions Called 'Unconscionable'

This practice is unconscionable. The
hard work of Congress in passing the
bipartisan budget resolution was not an
academic exercise. It was a solemn
commitment that transforms a manchate from the people into a compact
with the people.

The properties of the Administration

I urge the House leaders to revise the committee work so that it honestly and

Future of Communism

Future of Communism

Mr. President, last month you told
graduates at Notre Dame that Western
civilization will transcend communism
and that communism is, in your words,
a sad bizarre chapter in human his bory
written. In Plant context, is we being
written. In Plant context, is we
constitute the beginning of the end of
Soviet domination of Eastern Europe?
A. Well, what I meant then in my relieve now about what we are seeing the
together. I just think that it is impossible, and history reveals this, for any
freedom to people and have that go infreedom to people and have that go infreedom to people and have that go inmed to it, and I think the things we're
seeing not only in Poland but the reseeing hot only in Poland but the reseeing the

Israell Attack in Iraq

Q. Have you learned anything in the past 10 days that would support Israel's contention that its attack on the Iraqi nuclear plant was defensive, Was it proper? If it was defensive, was it proper? If it wasn't defensive, what role — what actions could the United States take beyond:

A. I did make a statement in which I condemmed that and thought that it was — that there were other options that might have been considered. That we would have welcomed an opportunity, for example, to try and intervens with the condemmed that of the intervension is the property of the past of the intervension is the property of the past of the intervension is the past of the intervension is the intervension in the past of the intervension is the intervension in the past of the intervension is set in the intervension in the intervension is the intervension in the intervension is the intervension in the intervension in the intervension is not present and in the intervension in the intervensi

gress, and that review is not yet complete.

On the other hand I do think that one has to recognize that Israel had reason for concern in view of the past history of Iraq, which has never signed a concern in the past history of Iraq, which has never signed a concern in the past history of Iraq, which has never signed as a national state of the past history of Iraq, which has never signed as country.

But I think the biggest thing that comes out of what happened is the fact that this is further evidence that a real peace, a settlement to all of the Midden peace, is the peace, as extended by the peace, as extended by the peace, as the peace, as extended by the soviets, Iran invaded by Iraq and that was in violation of a treaty. Leabonn's sovereignty has been violated routinely. Now this latest act, And in this that move — and this I have stated to the representatives of several Arab countries — a compelling reason why we should, once and for all, settle this matter and have a stable peace.

Q. Can you say was it? Do you think-

and have a stable peace.

Can you say was it? Do you think that it was a defensive move? Anygwhich indicates that yet?

tning winch indicates that yet?

A. No, I can't answer that because, as I say, this review has not been completed but what I would have to say is I think in looking at the circumstances that I outlihed earlier that we can recognize that very possibly in conducting that mission, Israel might have sincerely believed it was a defensive

Foreign Policy Program

Q. Mr. President, a couple of times in recent weeks your staff has told us that you were not quite ready to make a major foreign policy address and declined the opportunity to do so. In light of recent events in the Middle East and in Eastern Europe, have you given serious thought to a foreign policy pro-

The second major economic item on the agenda is a cut in the tax rates that we promised the American people.

Some 12 days ago, I outlined the basic elements of a bipartisan tax plan that pour date multipear across-the-board elements of actual to the second the second to the second the second to the second to

Gathering Consensus Seen

I am pleased to report from conversations with Senators and Congressmen, I am convinced there is a gathering bipartisan consensus for this tax bill.

But once again, time is fleeting. Just to take care of the paperwork associeffective on Cott. I, we must quickly have the legislation on the books.

More immodrant, let us never forcet

More important, let us never forget the mandate of November. The people of this nation have asked for action. And they deserve it now, not some-where down in a misty future.

where down in a misty future.

Therefore, I am asking Congress today to live up to its original commitment and deliver to my desk before the August recess not one, but two bills. A spending bill and a tax bill.

Only then can we say as elected representatives that we truly deserve a rest.

QUESTIONS AND ANSWERS

A reporter rises to ask a question. Following new ground rules, reporters could raise their hands to ask for recognition but could not shout.

could raise their hands to ask! of nuclear power for peaceful purposes. And so it increases the difficulty if you're going to encourage the one, because you have at least opened a crack in the door where someone can proceed to the development of weapons. But I rim unclear weapons but, as I've said many times, I would like to enter into negotions leading toward a definite, verifiable reduction of strategic nuclear weapons worldwide.

There seems to belog in 5 somehow widence to have a foreign policy, and until you make an address you don't have one, and I challenge that. I'm satisfied that we do have a foreign policy, I have met with eight heade of state and its going to meet with the Asian nations. The Secretary of State has been in Afficia and is now returning by way of Europe. I have been in personal communication by mail with President Gurope. I have been in personal communication by mail with President I don't necessarily believe that you must, to have a foreign policy, I've spoken about a number of areas. We're going forward und hake a wide declaration, this is your foreign policy. I've spoken about a number of areas. We're going forward and have a wide declaration, this is your foreign policy and the second of declaribean. We have tried to deal with various areas of the world, both Asia, Afria and in Europe— and so as to an address, I definitely did not do one at believe, as I said at Notro Bame, that it has been traditional for people like my bosition to go and use a graduation ceremony as a forum for making an adceremony as a forum for making an adthought that the young people who wer graduating deserved a speech, whether good or bad, that was simed at them. A. I think that having only been here five months no one should be making a five months and the second three-years-and-seven-months from now.

Q. Can you tell us why your aides are making such statements in public? Is it to prevent you being regarded, at this to prevent you being regarded, at this contraction of the second three years and seven-months from now.

Q. Can you tell us why your aides are making such statements in public? Is it to prevent you being regarded, at this contraction, and it's something that for the first four years in Sacramento I always re-reasons I refused to answer it because I, myself, am determined that any decisions that we make in this Administration are not going to be made based on whether they might have an affect on whether they might have an affect on political ramifications to them.

But I'll make that decision when we get closer to that — actually, I suppose shalf I'm asying is the people make bind I'm saying is the people make whether you're going to run again or whether you're going to run again or whether you should or not.

Helping Minority Business

Q. Thank you, Mr. President, Your Administration, to some extent, has been called an administration or a Presidency of the wealthy. I'm wondering if you have laid out any programs in your Administration currently that will influence that the programs in your administration currently that will influence that the programs that relate to business and other programs that relate to business development for minorities.

And I believe that our economic package is aimed at stimulating the economy, providing incentives, incere jobs, and those jobs will make it possible for those people who are now economically below the norm to get a foot on the ladder and improve themselves, and those jobs will make it added to the programs, such as aid to small business. And I would think, for one, the minority community and the black community has the most aid to small business. A. Well, I don't know how the Soviet Union will react. But all we have done is go to the Peoples Republic of China — we've wanted, and I've said for a long time, to improve relations with many other countries, and not necessarily military allies of ours, in making certain technology and defensive weapons available to them. And I think this is a normal part of the process of improving our relations there.
